

Customer Journey Map

Date	29 June 2026
Team ID	XXXX
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

The Customer Journey Map enables developers, data scientists, and agricultural stakeholders to identify challenges in crop selection, improve user experience, and optimize the overall crop recommendation process.

Phase of Journey	Stage - 1 Input Submission	Stage -2 Data Processing & Prediction	Stage-3 Result & Recommendation
Actions What does the farmer do?	Enters soil and environmental parameters (N, P, K, temperature, humidity, pH, rainfall) and submits the form	System processes input and runs ML model prediction	Views predicted crop result and makes farming decision
Touchpoints What does the farmer interact with?	Web application input form	Flask backend + Machine Learning model	Result display page
Customer Thought What is the farmer thinking?	"I hope I get an accurate crop recommendation."	"The system is analyzing my data."	"This will help me choose the best crop."

Process Ownership Who handles this stage?	User / Farmer	OptiCrop ML System + Backend Model	OptiCrop Application
Opportunities How can this be improved?	Simplify input form and reduce errors	Improve model accuracy and prediction speed	Provide explanation for recommended crop and improve UI clarity
